

Capture the Memory

Carlson's Studio has something for everyone—including children! Children grow up so quickly and that makes capturing each stage of their life priceless. To capture their growth, we have developed creative and eye-catching displays and packages that you will treasure for years to come.

When to Get Your Child's Portrait Done

Newborns can be photographed as soon as you bring them home from the hospital, so at your leisure, set up your appointment.

After that, we recommend that you bring your child in at approximately 3, 6, and 12 months to capture their first year of life. See inside to choose which package and display options are best for your child's age.

Why Choose Carlson's?

Instead of relying on the mall or big chain stores for your pictures, make an appointment with Carlson's Studio. When you arrive for your appointment you won't be standing in line, nor will you be rushed out the door. Our studio is private and personal—you'll feel relaxed and so will your child. We will take our time and shoot a variety of beautiful portraits.

And whether it's "just because" or a special occasion, we have the perfect props and backdrops to complement your needs and your child's outfit.

We know you want portraits to cherish for a lifetime, so call us today at **585-786-2871** to set up your appointment.

"Tender Moments" Session

Photographing Your Newborn

"Art Print" Display

Cherish the Moments
